

500X

THE
SIDE
OF
BEAUTY

The **500X** expresses the values that made the 500 an icon recognised all over the world.

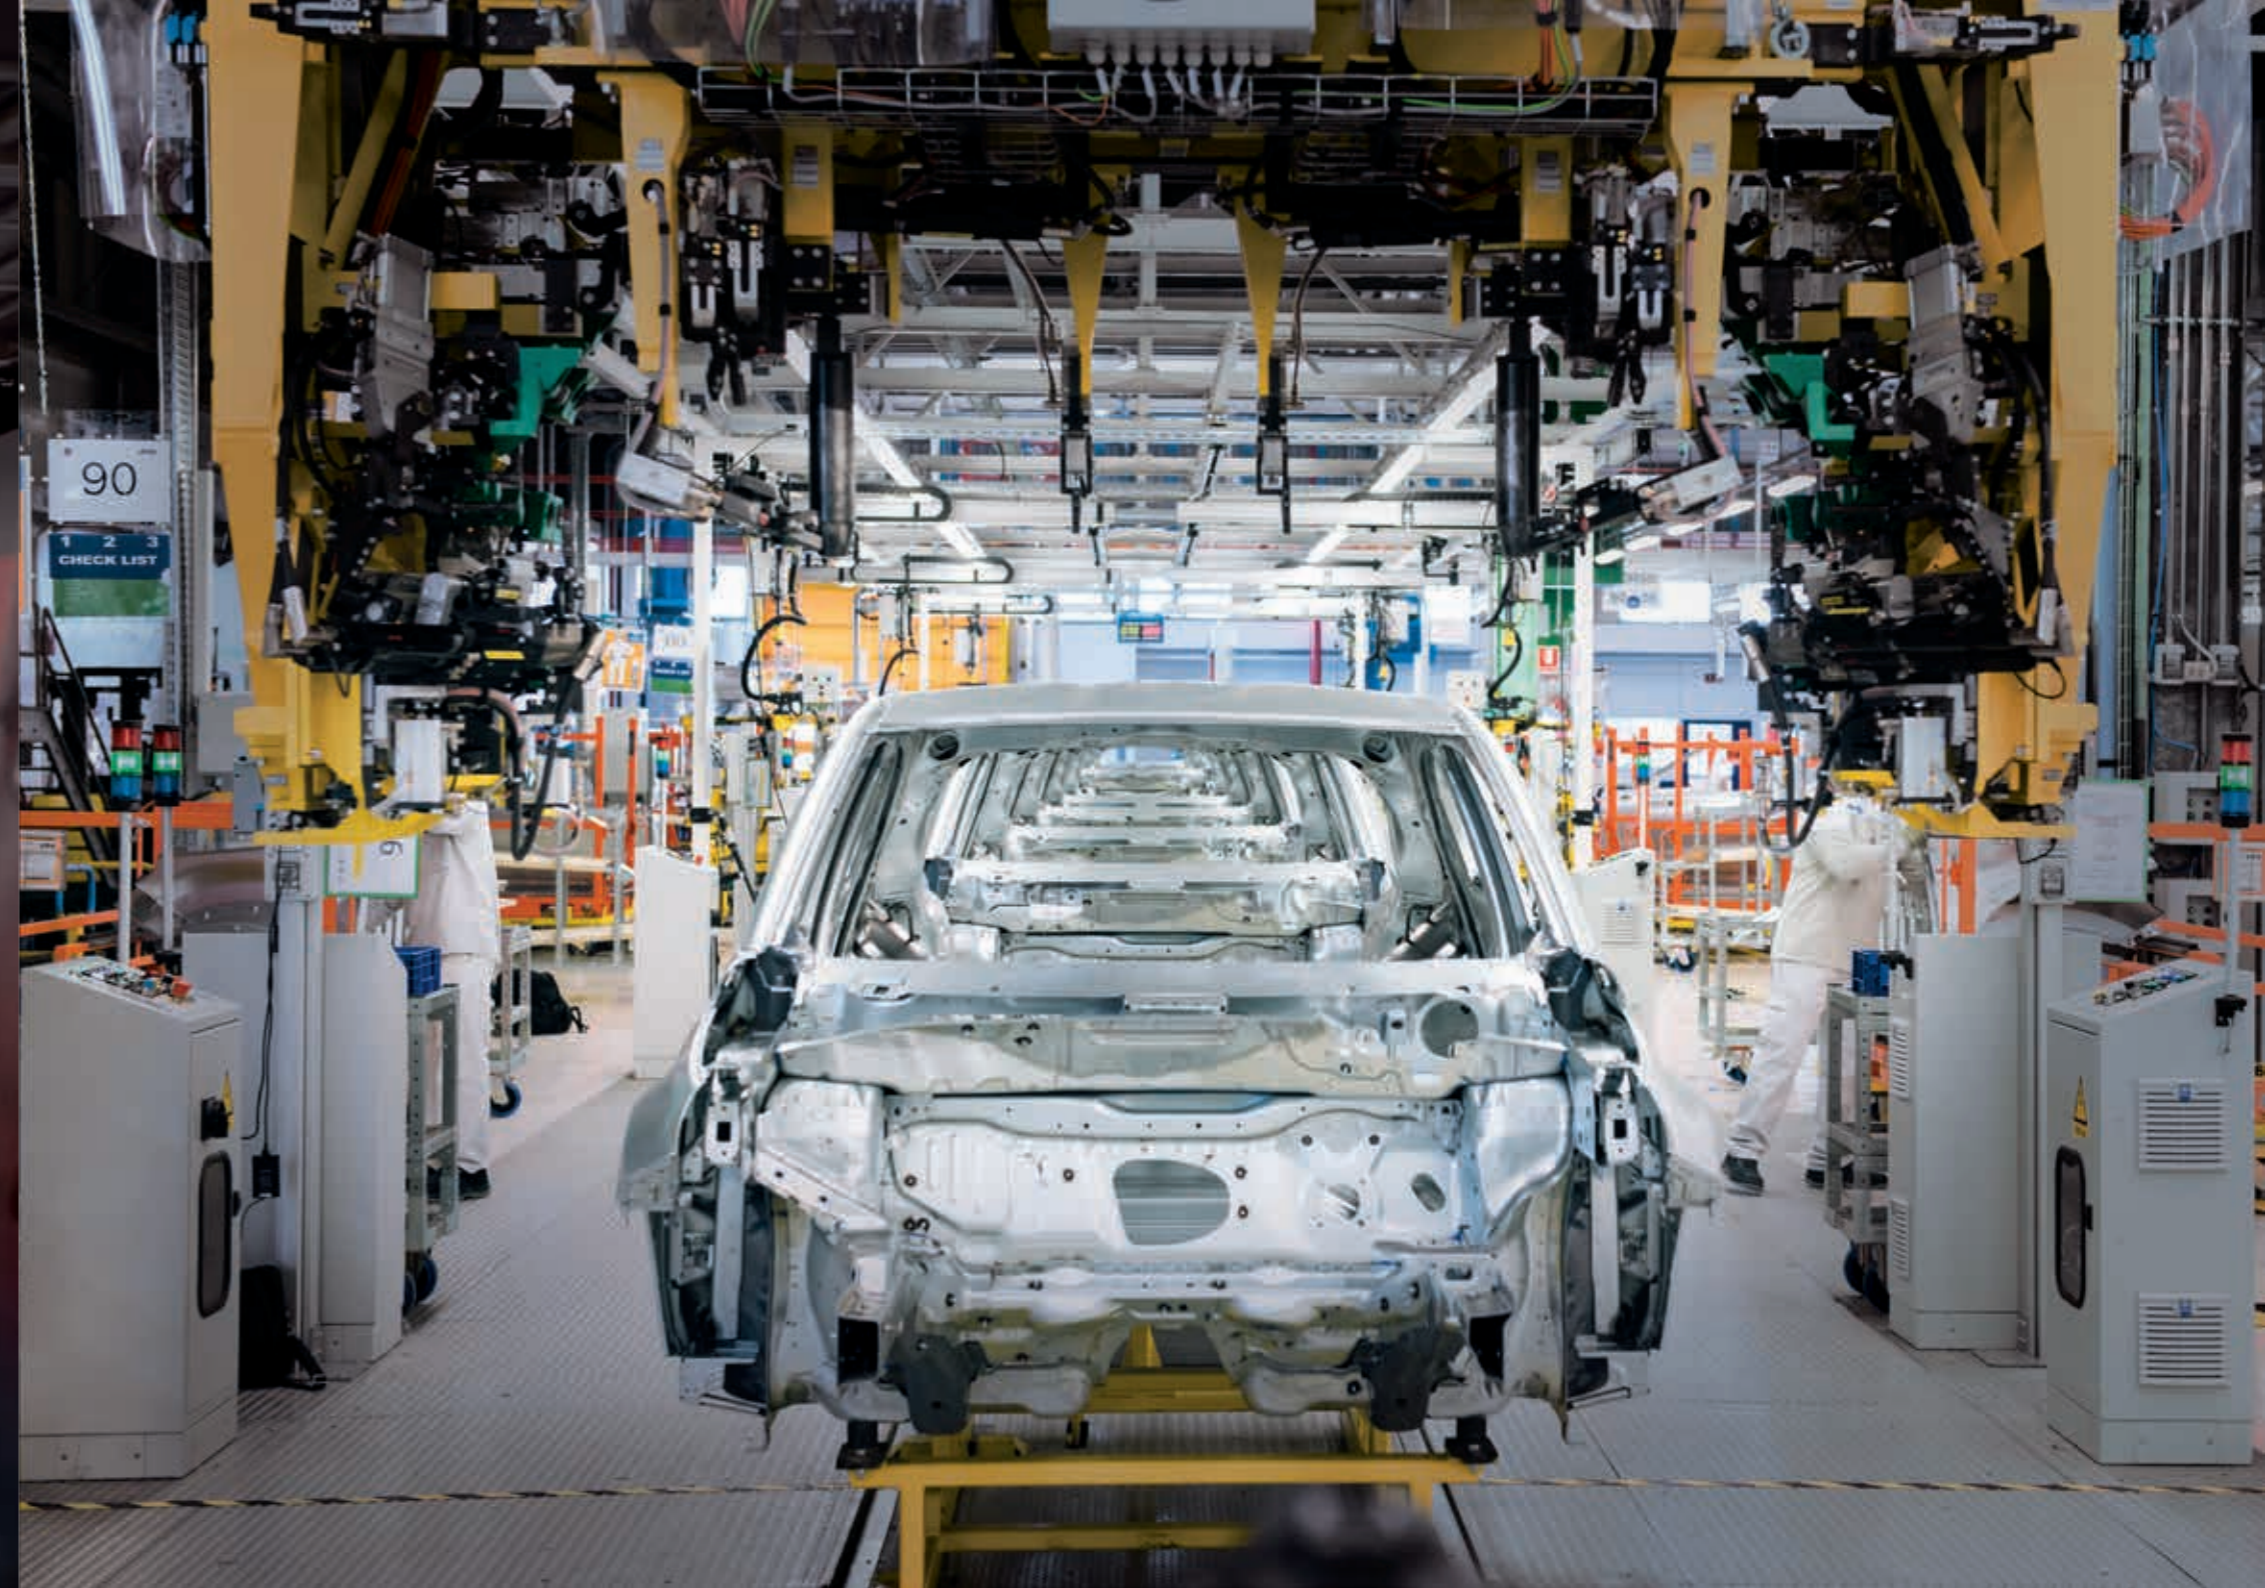

In the 500X, the seduction of Italian design is made complete with the solidity of a car which is comfortable, high-performance and always connected to the world.

WORLD CLASS QUALITY

Excellence comes from excellence: the **500X** is produced at the renovated SATA plant in Melfi (Potenza), one of the world's most efficient production sites and the first in Italy to receive Silver Level WCM (World Class Manufacturing) certification according to this international production cycle organisation method. The plant at Melfi is an organisational model inspired by the principles of streamlined production that reduces the production chain, simplifying the assembly operations to bring the **500** family's newest wonder into existence.

CLASS and PERSONALITY

o----- 500X

It takes talent to get yourself noticed in style on the city streets. The versions with a metropolitan mood have the right outfit to do just that, thanks to styling of the bumpers that enhances the body colour and to the chrome style details that highlight the quality.

EXCEPTIONAL

TRANSMISSION

The **500X** comes equipped with an automatic 6-speed dual clutch transmission, designed for those who want to get even more performance and pleasure from their ride. You can use it in automatic mode, if you're after a more comfortable drive. Or, if you're looking for something more responsive, select the sequential feature to enable you to change gears.

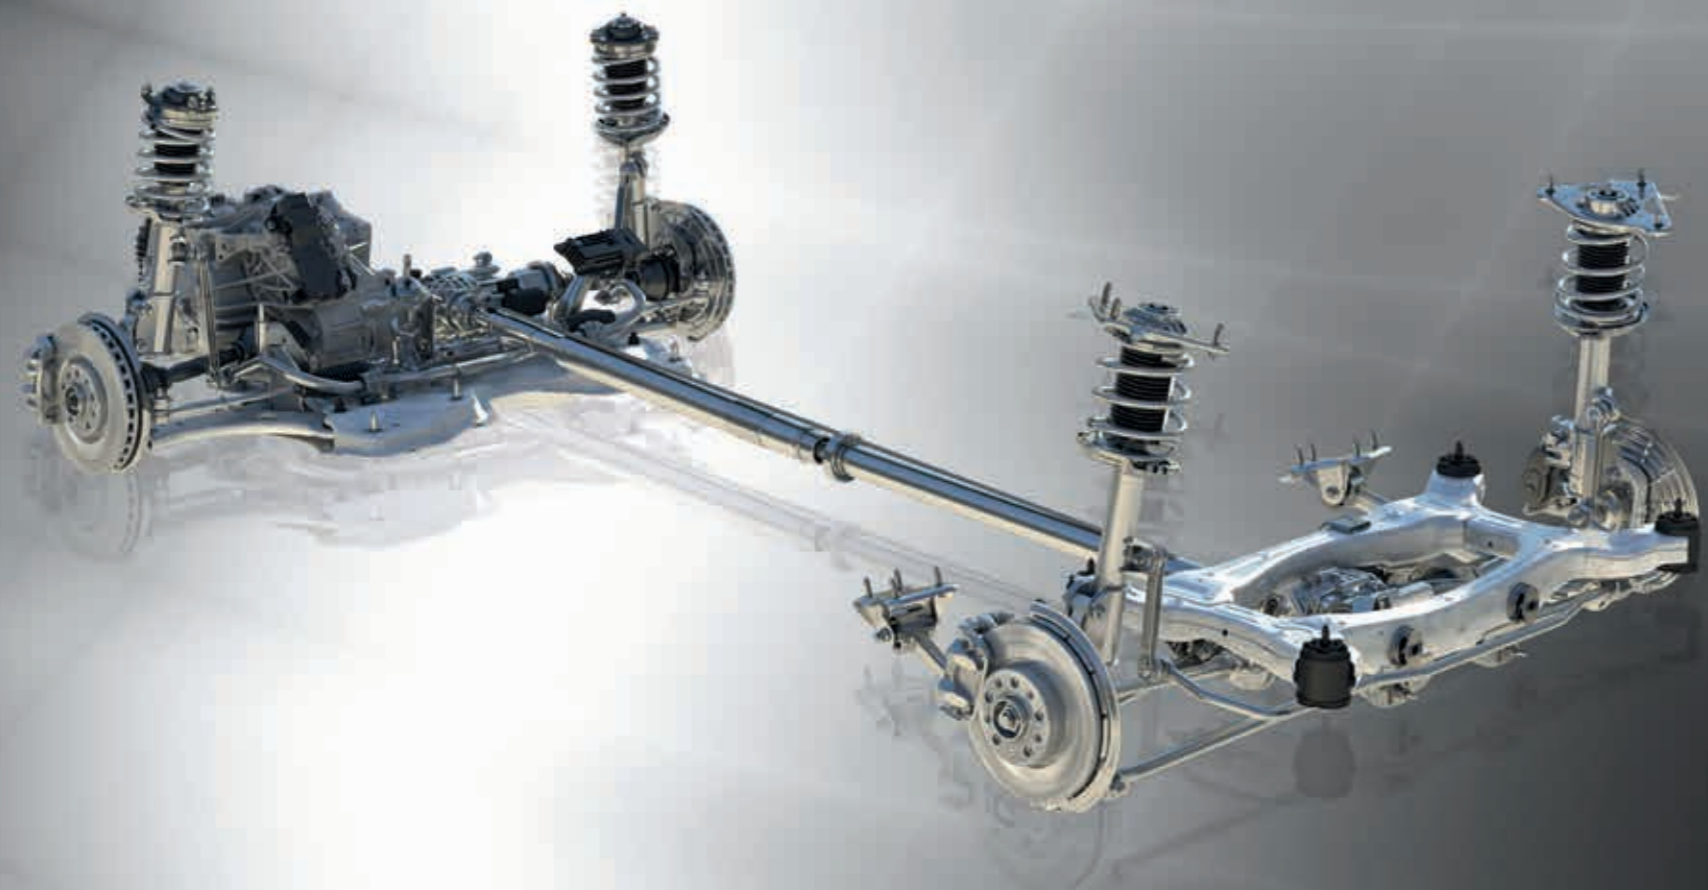

TREME

DRIVES

The 500X behaves like a crossover in a higher class, thanks to its enviable balance of handling, stability and satisfaction at the wheel, courtesy of the MacPherson independent rear suspension.

4x2 TRACTION+

The Traction+ system, combined with the 4x2 engine versions on the Cross and Cross Plus versions, is an electronic traction control system that, acting on the braking system, ensures optimal torque distribution on the front axles, allowing the car to tackle low-grip surfaces.

The Drive Mood Selector allows the driver to select, through the control on the central tunnel, one of the three available "moods" that optimise driving dynamics, altering the behaviour of the car.

X CITING ENGINE

The 500X comes standard with a powerful 1.4 Turbo MultiAir pumping out 140 of horsepower at 230 Nm of torque with an innovative dual clutch automatic transmission to comply with Euro 5 standards. All equalling outstanding performance but also limited consumption and CO2 emissions.

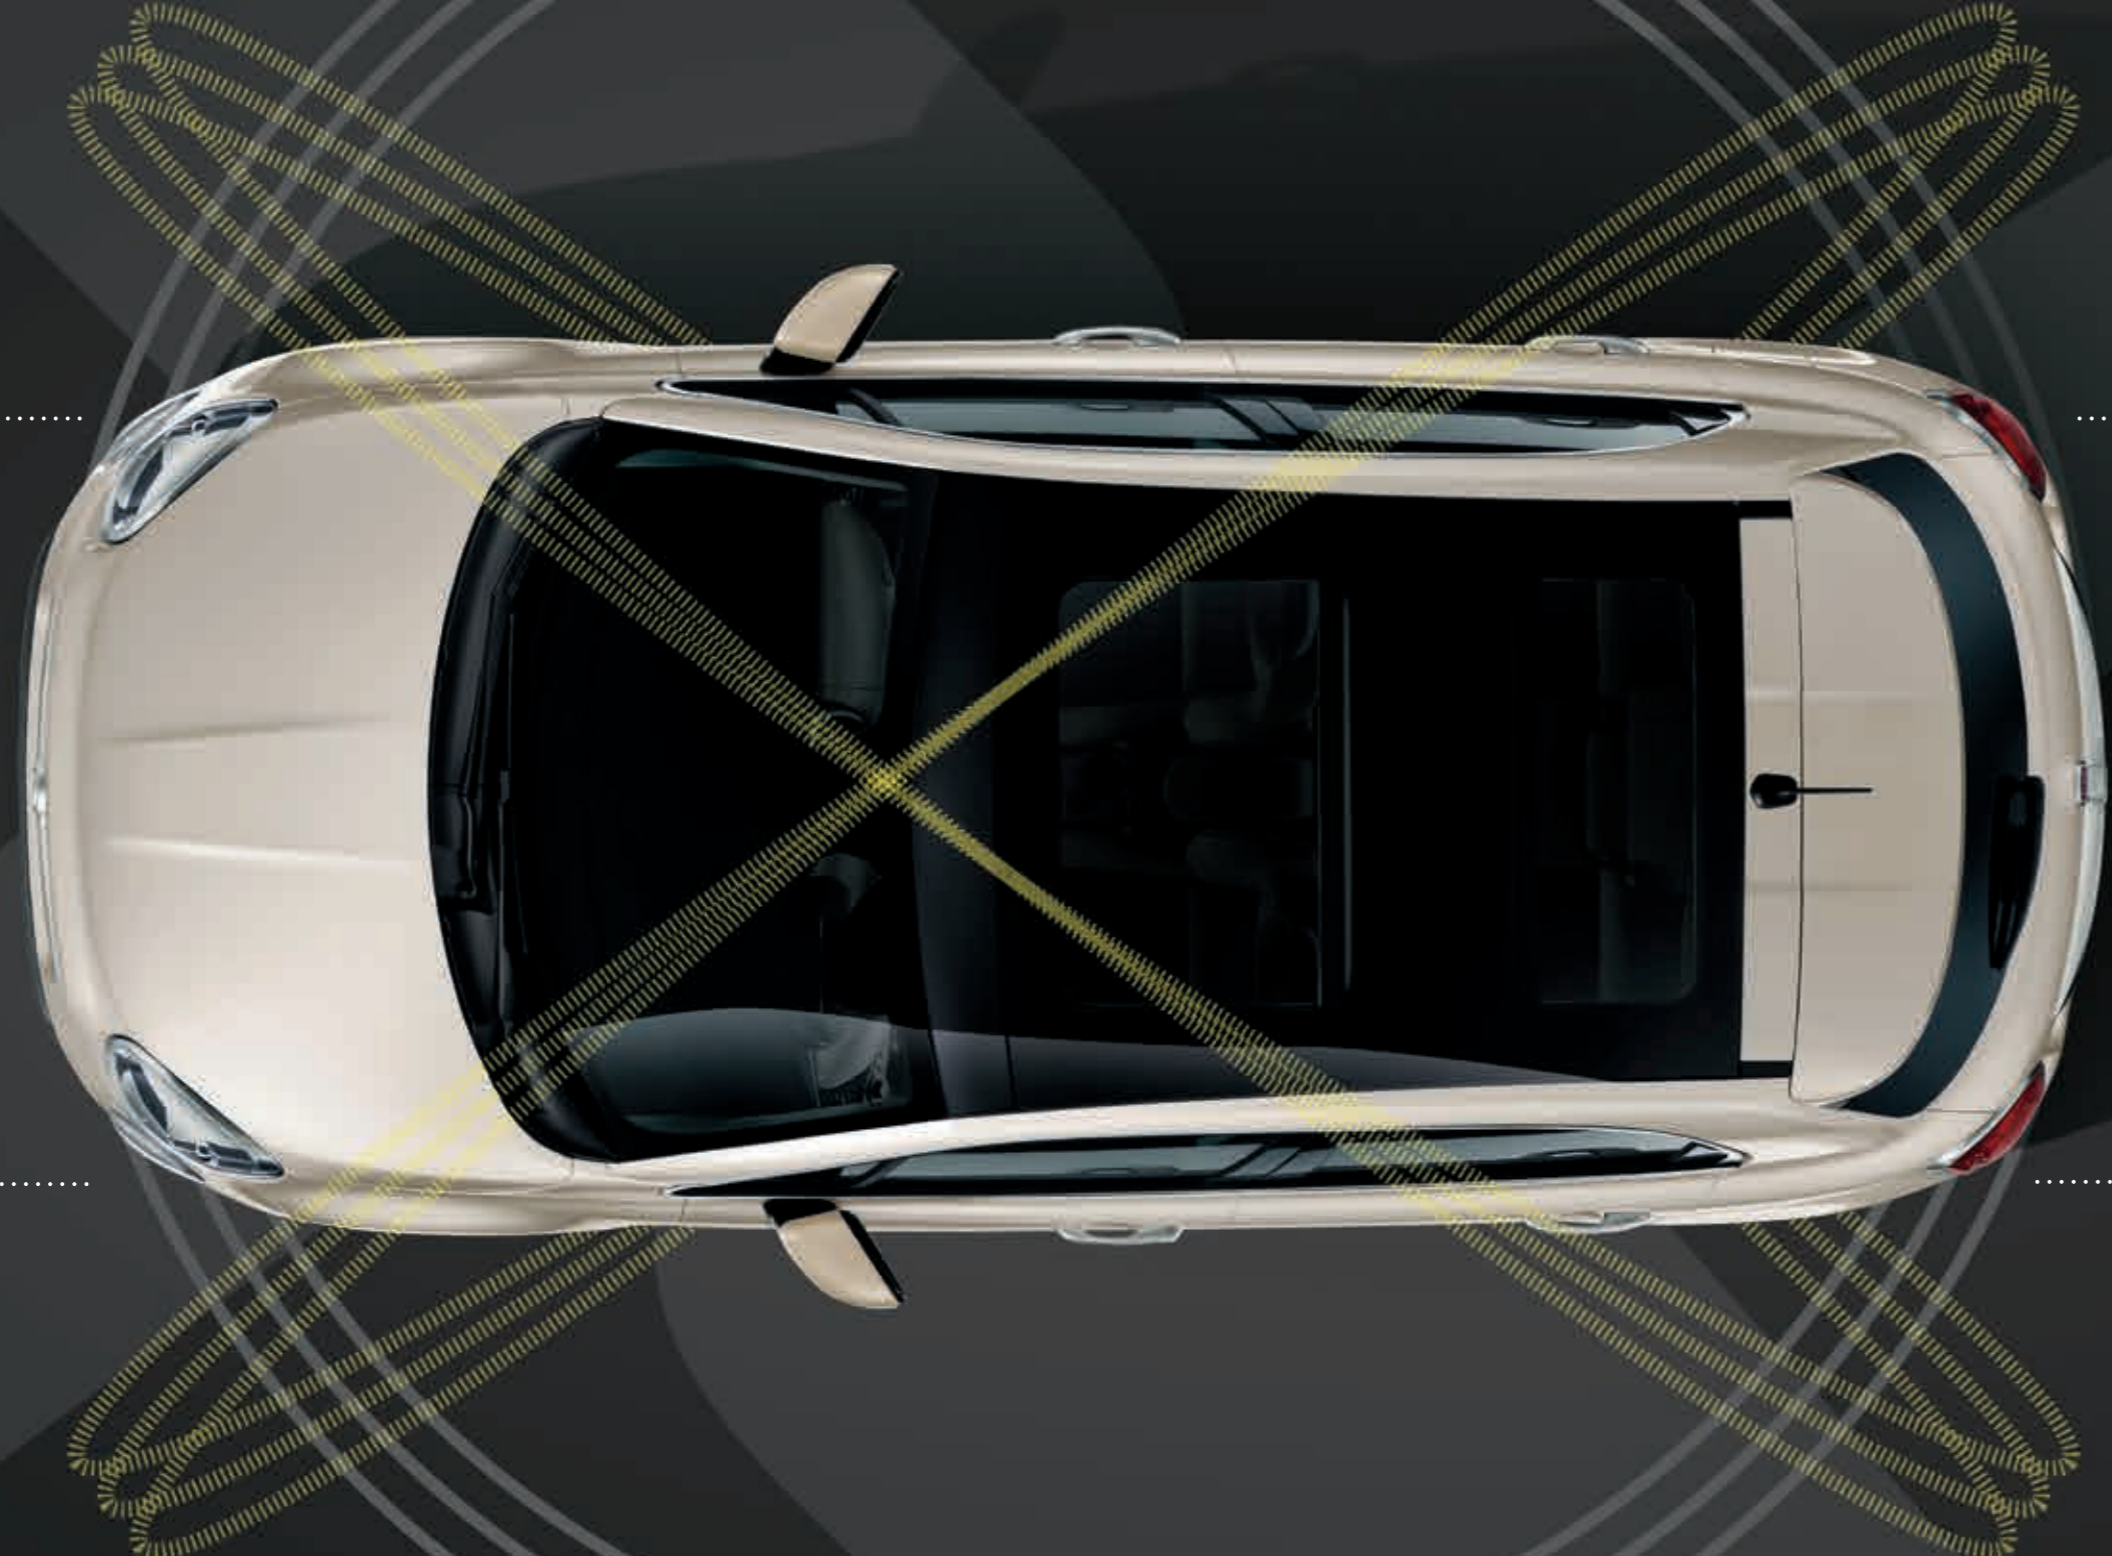

TRAORDINARY

SAFETY

With the 500X you can enjoy every journey in complete peace of mind thanks to the wealth of safety equipment, which includes, in addition to the airbags and the ESC system as standard. Maximum protection, minimum stress for an exceptional driving experience.

BRAKE CONTROL

ELECTRIC PARKING BRAKE

BLIND SPOT ASSIST

..... LANE ASSIST

..... REAR CAMERA

..... REAR PARKING SENSORS

Brake Control

Advises the driver if it detects, via the radar and video sensors, too great a difference in speed between the 500X and the vehicle in front and consequently the risk of a collision. Should the driver not intervene, the system automatically activates braking to avoid the impact or mitigate its effects.

Blind Spot Assist

Monitors the presence of vehicles in "blind spots" and advises the driver through a light signal on the door mirrors. Includes a function that advises the driver, when reversing, of the approach of a vehicle from the side.

Lane Assist

Advises the driver when they change lane involuntarily (without using the direction indicators). The visual indication on the instrument panel is accompanied by greater resistance of the steering to the change in direction.

TROVERTED

----- INFOTAINMENT

500X makes its way through the net and moves on the road with the same ease. Sociable and open to the world, the 500X is always connected to the most important social networking sites through the range of UConnect™ Live systems.

Uconnect™ Radio 5" DAB adds a large 5" touchscreen and DAB (Digital Audio Broadcasting) digital radio tuner, on top of the steering wheel controls, to the Bluetooth® Hands-Free, Bluetooth Audio streaming and eco:Drive functions.

Uconnect™ Radio 6,5" Nav DAB represents the best of the infotainment offer, and adds a large high-definition 6.5" screen and 3D Navigation function.

UCONNECT™ Radio 5"

UCONNECT™ Radio Nav 6.5"

On board the **500X** it's easy to let out your emotions and transform them into music with the **Beats Audio Hi-Fi** system. Thanks to its 9 speakers and amplifier with power of more than 500 watts, it offers sounds which is substantial but also clean and high-fidelity.

TRA
COMFORT

The 500X takes care of its passengers with unique details. The driver is at the centre of all the attention: the dashboard welcomes the driver with an unmatched touch and feel, thanks to the quality of the surfaces, finishes and materials, exclusives of the 500X. The seats have been designed to offer optimal comfort: they're wide and welcoming and the sides are embellished by finishes in refined "prêt-à-porter" materials.

PRESSIVE

COLOURS

Communicative and original, the 500X loves to express itself with 12 different colours, as many different hues as in life: 4 pastel, 5 metallic, 1 matt metallic and 2 three-layer.
